**Secure Stick is a reliable assistant in
securing all important data on your
computer**

Secure Stick is targeted for:

Windows 2000

Windows 2003

Windows XP

Windows Vista

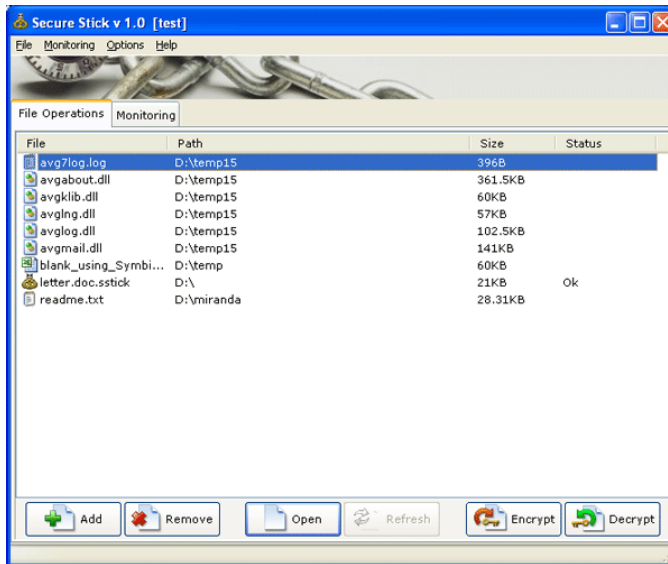

Application features

- Without the unique USB stick it is impossible to view or use sensitive information
- Encrypts and secures any file or directory on PC
- Multiple simultaneous file encryption implemented
- Files encrypted by one user are not visible by another user
- Many different USB sticks can be used on one PC
- Secure Stick is integrated into the context menu of the file management on PC

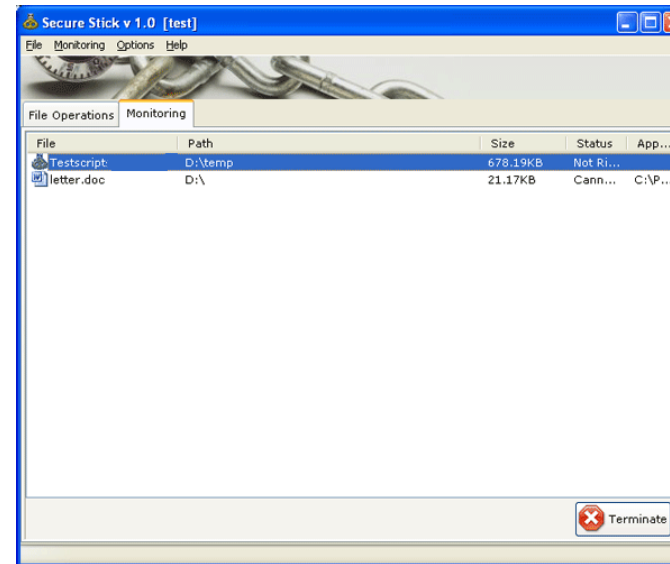

File Operations screen

Contains the list of all added files

Monitoring screen

Shows currently opened files

Secure Stick security process:

File encryption:

- Generates random password and encrypt file stream with RC6
- Uses private RSA-1024 key (from accepted USB stick) to encrypt generated in p.1 password
- Deletes original file, Wipes from hard drive (optionally), protects from undeletion (optionally)

File decryption:

- Decrypts random password previously encrypted with RSA-1024
- Decrypts file stream with password from p.1

Being encrypted the file gets the .stick extension and can not be opened until decrypted.

**Secure Stick is easily generated
with special Wizard software in
following steps:**

- Step 1: Insert USB Stick into PC (and click Next)
- Step 2: USB and Path selecting
 - From the list Select USB device choose the needed one by clicking on it
 - From the list Select drive where to save Key choose the drive
 - Then click Next
- Server Connecting
 - Choose the Secure Stick Title
 - Enter Username and Password
 - click Next (the Key is being generated)
- Receiving the successfully generated Key (this Key is automatically remembered by the USB drive and is ready to distribution and usage)

Secure Stick Target Market

- Enterprise use
 - Perfect for use in changing workplaces
 - USB Stick protects workplace privacy on any PC
 - Encrypted data is available only when the personal USB stick is inserted
 - workplace can be used by many employees, but the data of each of them are fully secured and confidential
- Private use
